Thanks, Megan ... for the photos and all the work today. I talked to Susan at the end of the day and she was pleased by our collective media efforts.

Subject: Photos for EPA's BP Whiting response webpage

We took these shots this evening. I have included some basic description in the titles. Please let us know which, if any photos, you are using and if you need more information for captions.

The photos titled documenting the outfall do not show any ongoing release, but do show where release entered lake and where boom was placed as of tonight.

Photos have EPA logos on OSC and there are EPA contractors "in action" consulting with him.

Thank you!
Megan
